

How to Install Arduino IDE and Driver ?

When getting started with this smart car kit, you need to use the software Arduino IDE. So how to install arduino software and driver? Take it easy, you can click the link below to check the step or take the following steps as reference. It is indeed easy for you get started with Aduino projects.

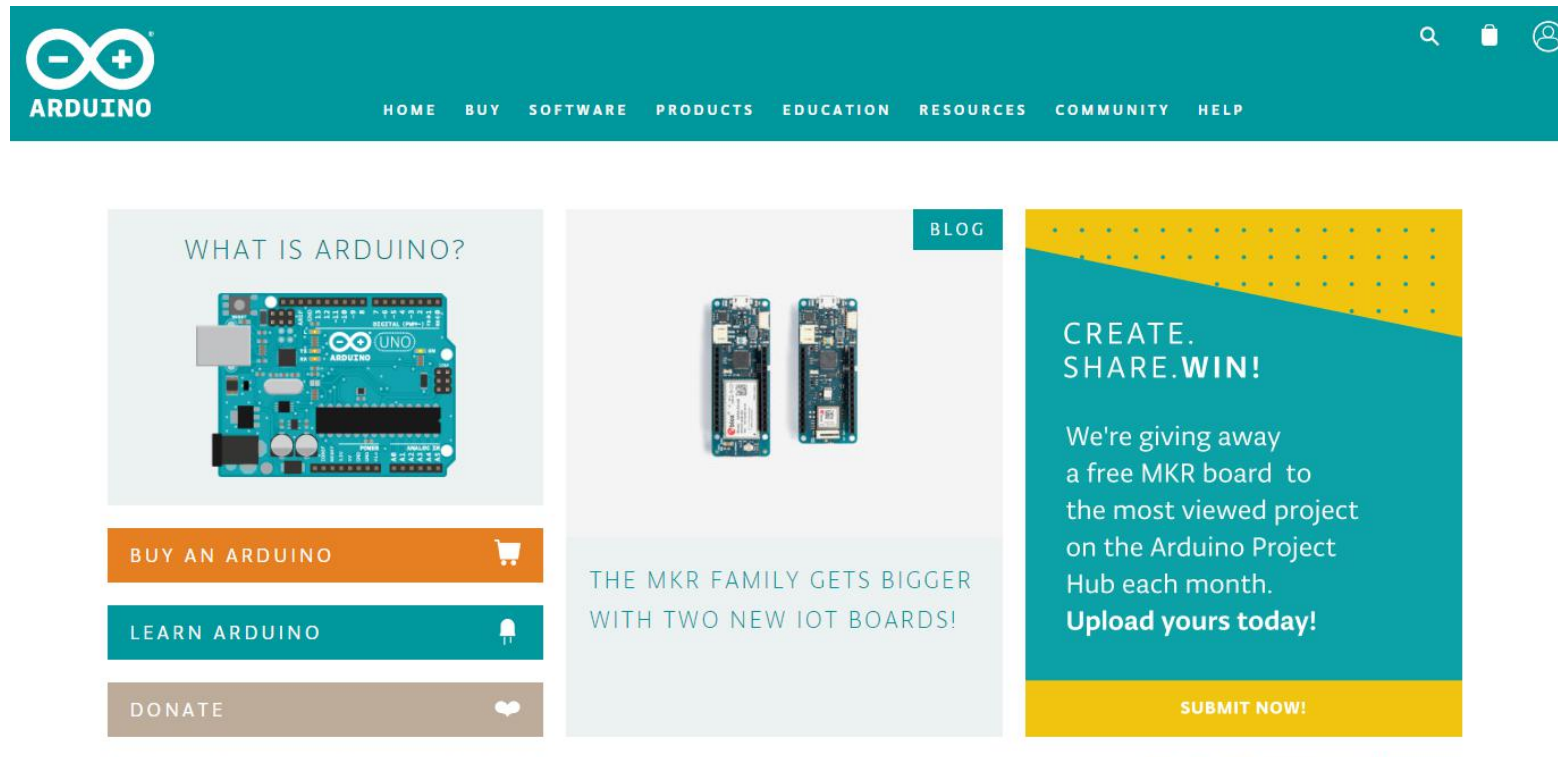

http://wiki.keyestudio.com/index.php/Download_Arduino_IDE_and_Install_Driver

Below is an example for you to get started with Arduino. In general, we have provided you with the software arduino-1.5.6-r2-windows, you can check it in the folder. It is very fast for you to click the icon of Arduino IDE to install it.

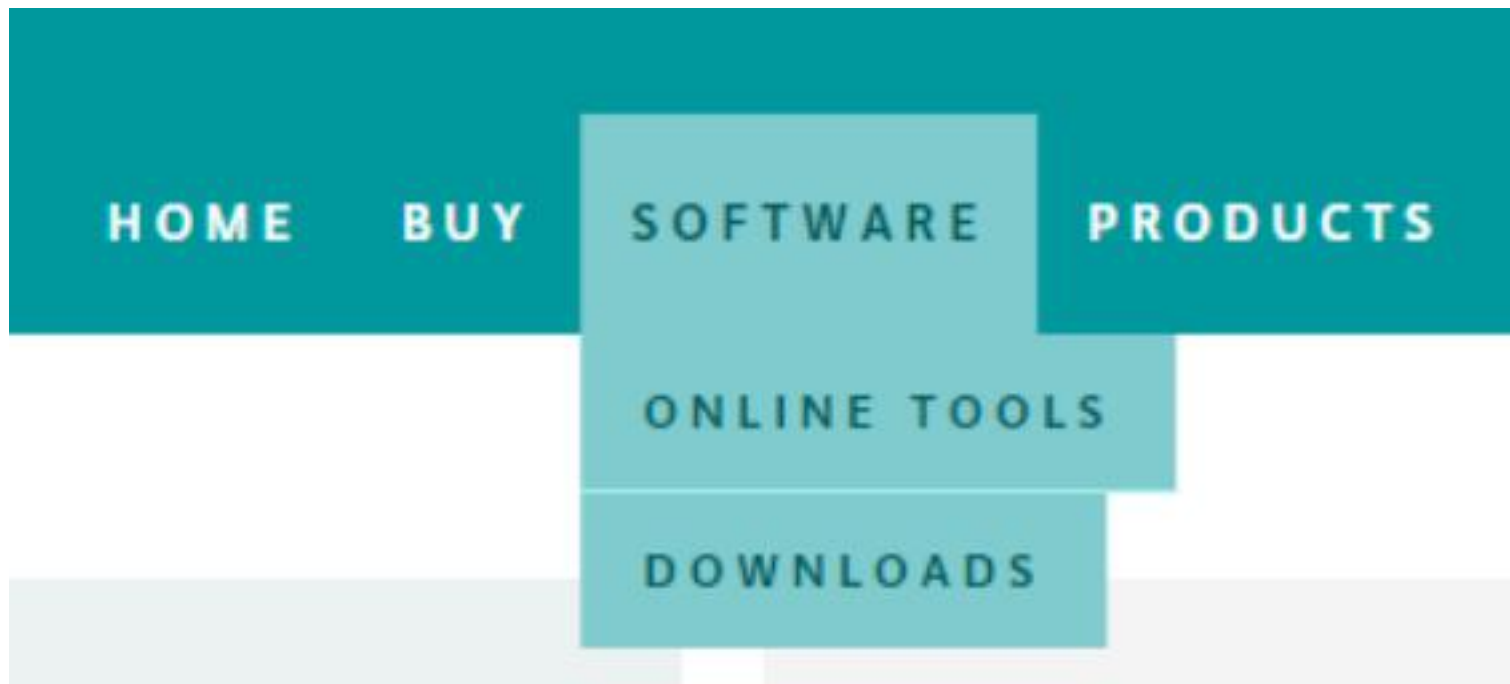

Installing Arduino IDE

When you get the UNO development board, first you should install the software and driver of Arduino. Here you can browse the ARDUINO website at this link, <https://www.arduino.cc>, pop up the following interface.

Then click the SOFTWARE on the browse bar, you will have two options ONLINE TOOLS and DOWNLOADS.

Click DOWNLOADS, it will appear the latest software version of ARDUINO 1.8.5 shown as below.

Download the Arduino IDE

ARDUINO 1.8.5

The open-source Arduino Software (IDE) makes it easy to write code and upload it to the board. It runs on Windows, Mac OS X, and Linux. The environment is written in Java and based on Processing and other open-source software.

This software can be used with any Arduino board. Refer to the [Getting Started](#) page for Installation instructions.

Windows Installer, for Windows XP and up
Windows ZIP file for non admin install

Windows app Requires Win 8.1 or 10
[Get](#) 

Mac OS X 10.7 Lion or newer

Linux 32 bits
Linux 64 bits
Linux ARM

[Release Notes](#)
[Source Code](#)
[Checksums \(sha512\)](#)

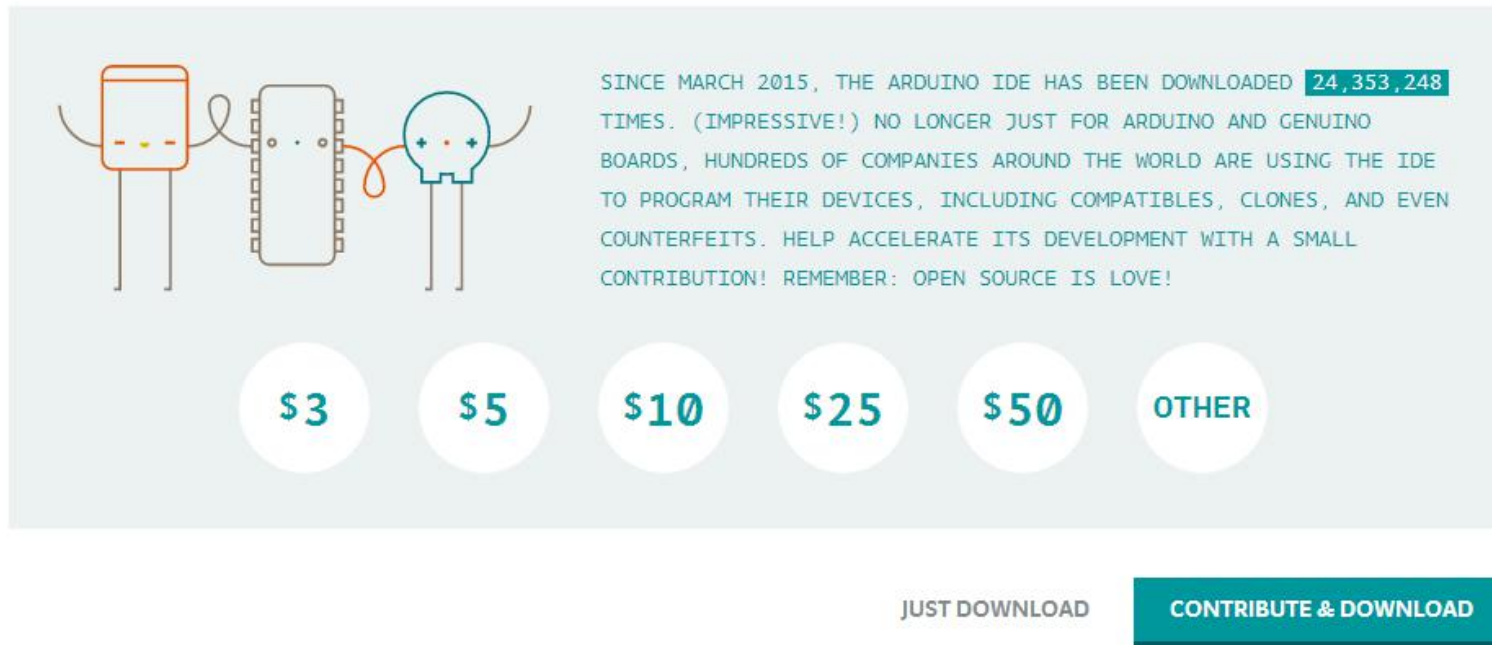

In this software page, on the right side you can see the version of development software for different operating systems. So ARDUINO has a rather powerful compatibility. You should download

the software that is compatible with the operating system of your computer.
In our project, we will take WINDOWS system as an example here.
For simple installed version, first click Windows Installer, you will get the following page.

Contribute to the Arduino Software

Consider supporting the Arduino Software by contributing to its development. (US tax payers, please note this contribution is not tax deductible). [Learn more on how your contribution will be used.](#)

The banner features three stylized characters on the left: a red square robot, a grey rectangular robot, and a blue circular robot. To their right, text states: 'SINCE MARCH 2015, THE ARDUINO IDE HAS BEEN DOWNLOADED **24,353,248** TIMES. (IMPRESSIVE!) NO LONGER JUST FOR ARDUINO AND GENUINO BOARDS, HUNDREDS OF COMPANIES AROUND THE WORLD ARE USING THE IDE TO PROGRAM THEIR DEVICES, INCLUDING COMPATIBLES, CLONES, AND EVEN COUNTERFEITS. HELP ACCELERATE ITS DEVELOPMENT WITH A SMALL CONTRIBUTION! REMEMBER: OPEN SOURCE IS LOVE!'. Below this text are six white circular buttons with teal text: '\$3', '\$5', '\$10', '\$25', '\$50', and 'OTHER'. At the bottom right, there are two buttons: a light grey 'JUST DOWNLOAD' button and a teal 'CONTRIBUTE & DOWNLOAD' button.

SINCE MARCH 2015, THE ARDUINO IDE HAS BEEN DOWNLOADED **24,353,248** TIMES. (IMPRESSIVE!) NO LONGER JUST FOR ARDUINO AND GENUINO BOARDS, HUNDREDS OF COMPANIES AROUND THE WORLD ARE USING THE IDE TO PROGRAM THEIR DEVICES, INCLUDING COMPATIBLES, CLONES, AND EVEN COUNTERFEITS. HELP ACCELERATE ITS DEVELOPMENT WITH A SMALL CONTRIBUTION! REMEMBER: OPEN SOURCE IS LOVE!

\$3 **\$5** **\$10** **\$25** **\$50** **OTHER**

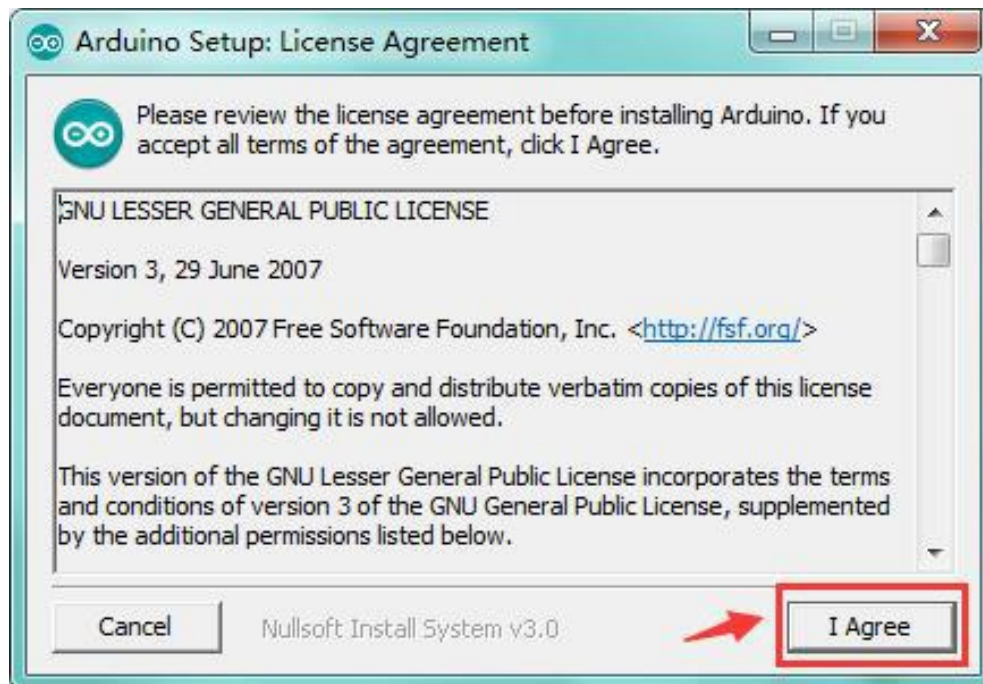

JUST DOWNLOAD **CONTRIBUTE & DOWNLOAD**

This way you just need to click JUST DOWNLOAD, then click the downloaded file to install it.

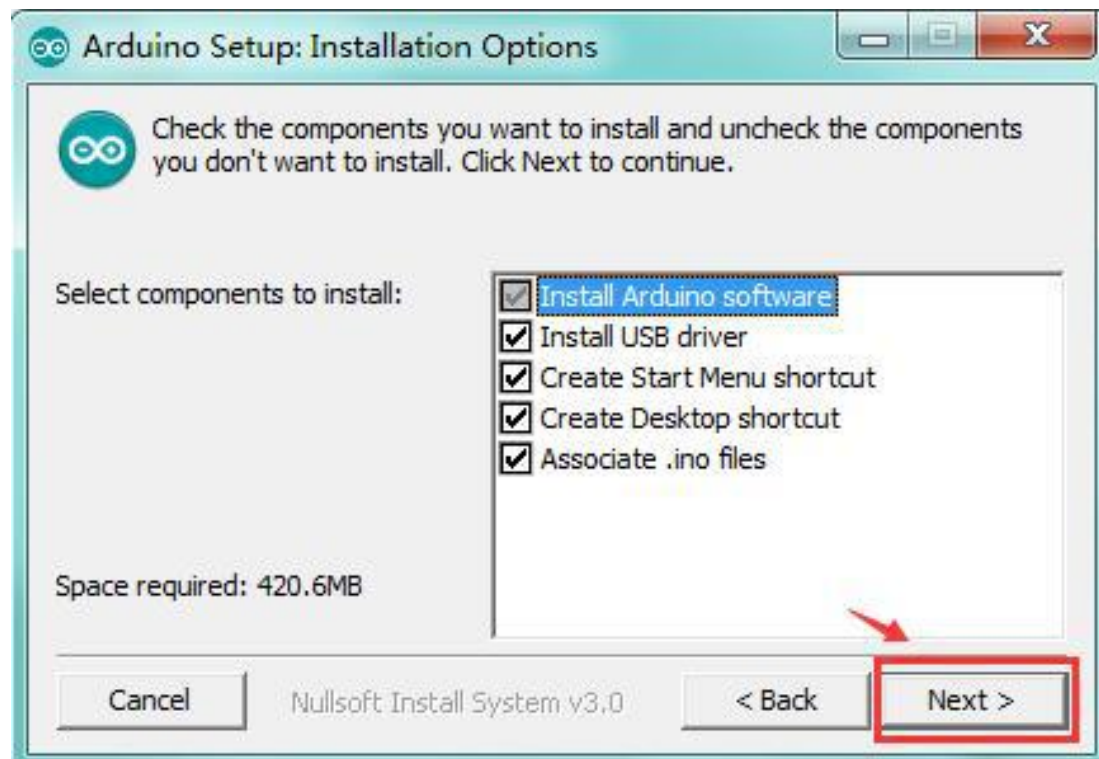

Click JUST DOWNLOAD, and when the ZIP file is downloaded well to your computer, you can directly unzip the file and then click the icon of ARDUINO program to start it.

Installing Arduino (Windows)

Install Arduino with the exe. Installation package

Click "*I Agree*" to see the following interface.

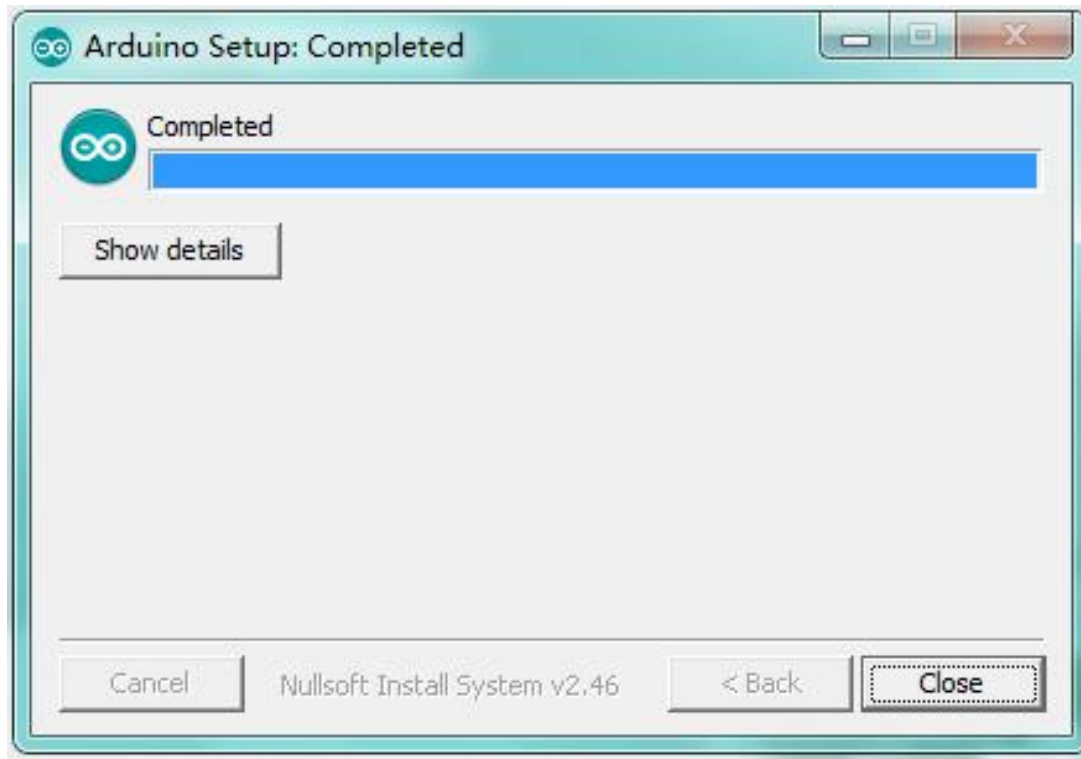

Click "*Next*". Pop up the interface below.

You can press Browse... to choose an installation path or directly type in the directory you want. Then click "Install" to initiate installation.

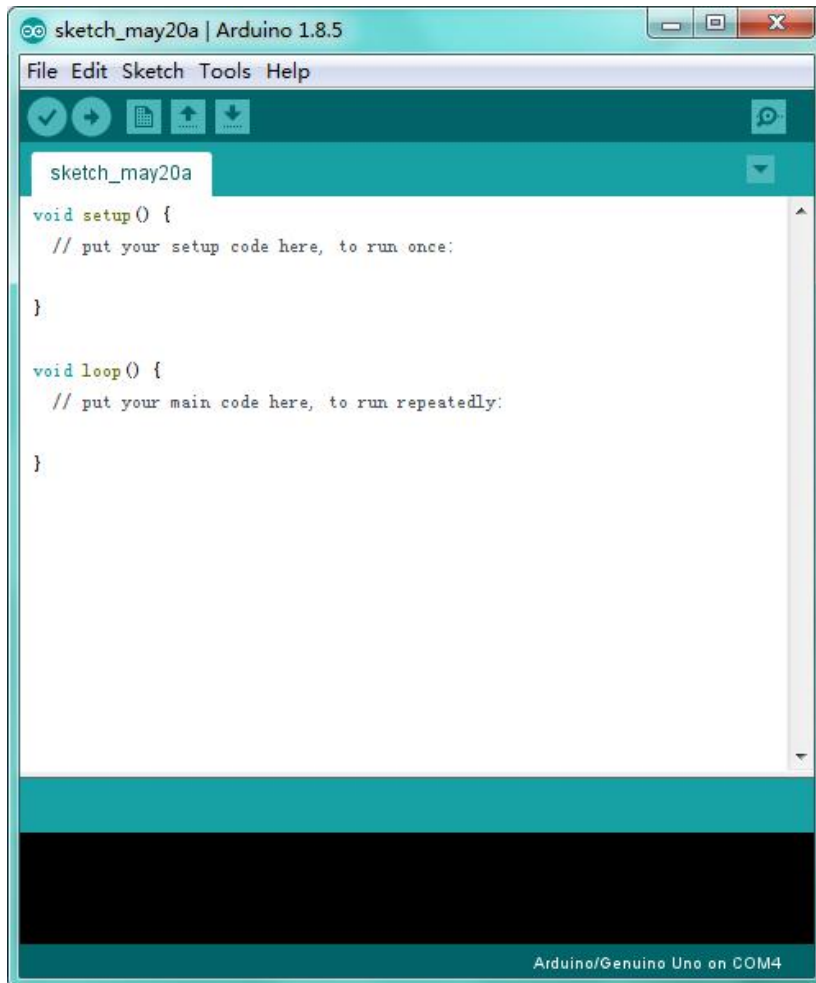

Wait for the installing process, if appear the interface of Window Security, just continue to click Install to finish the installation.

All right, up to now, you have completed the Arduino setup! The following icon will appear on your PC desktop.

Double-click the icon of Arduino to enter the desired development environment shown as below.

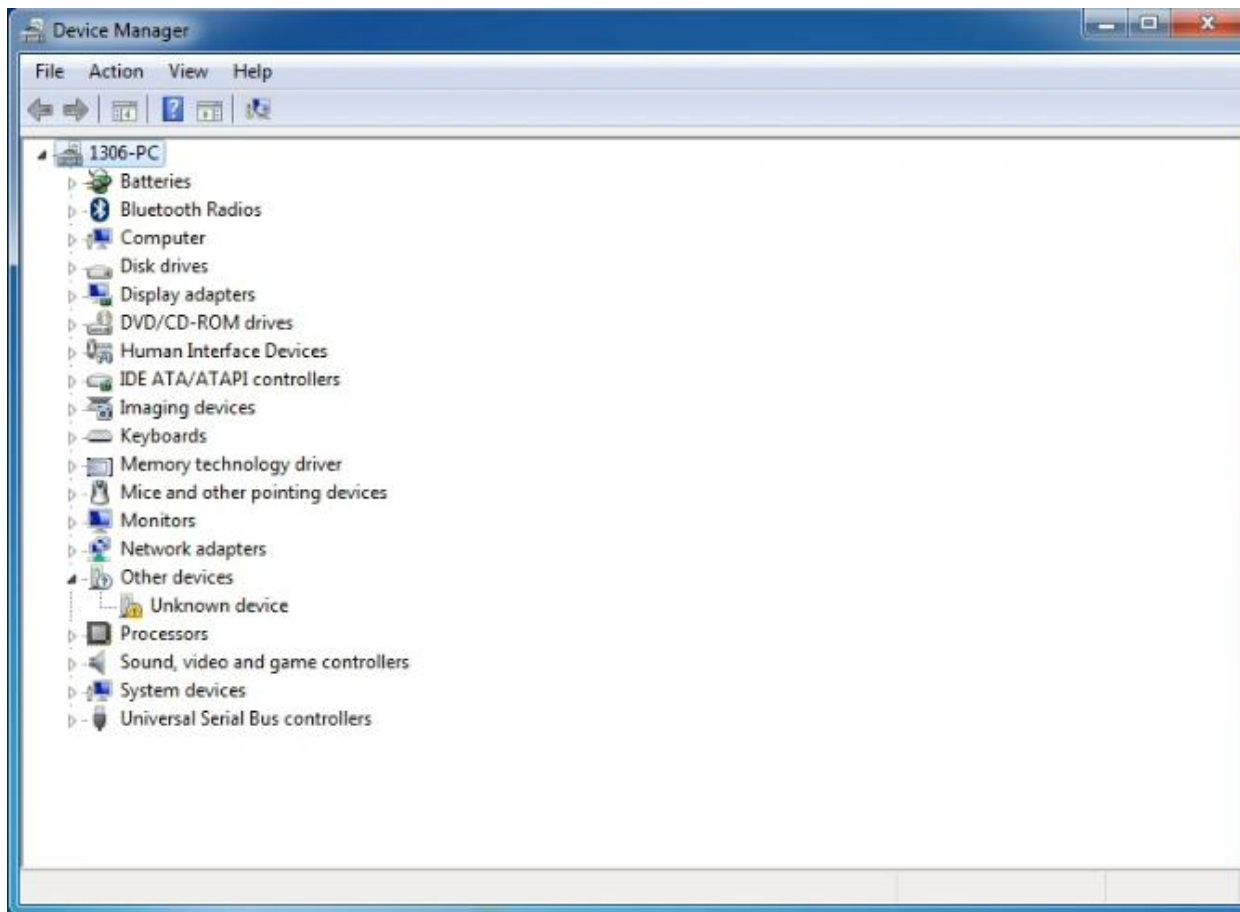

Installing Driver

Next, we will introduce the driver installation of UNO R3 development board. The driver installation may have slight differences in different computer systems. So in the following let's move on to the driver installation in the WIN 7 system.

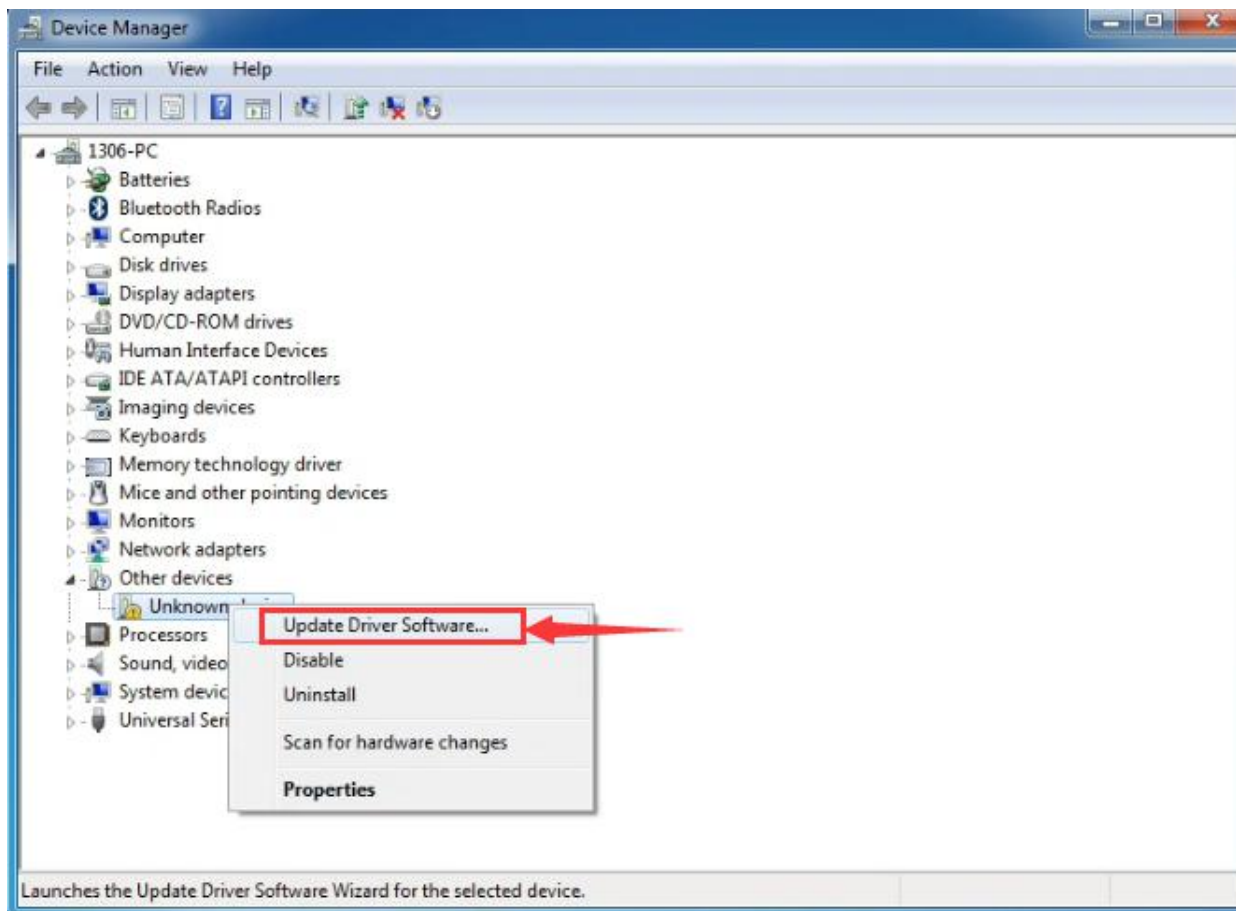

The Arduino folder contains both the Arduino program itself and the drivers that allow the Arduino to be connected to your computer by a USB cable. Before we launch the Arduino software, you are going to install the USB drivers.

Plug one end of your USB cable into the Arduino and the other into a USB socket on your computer.

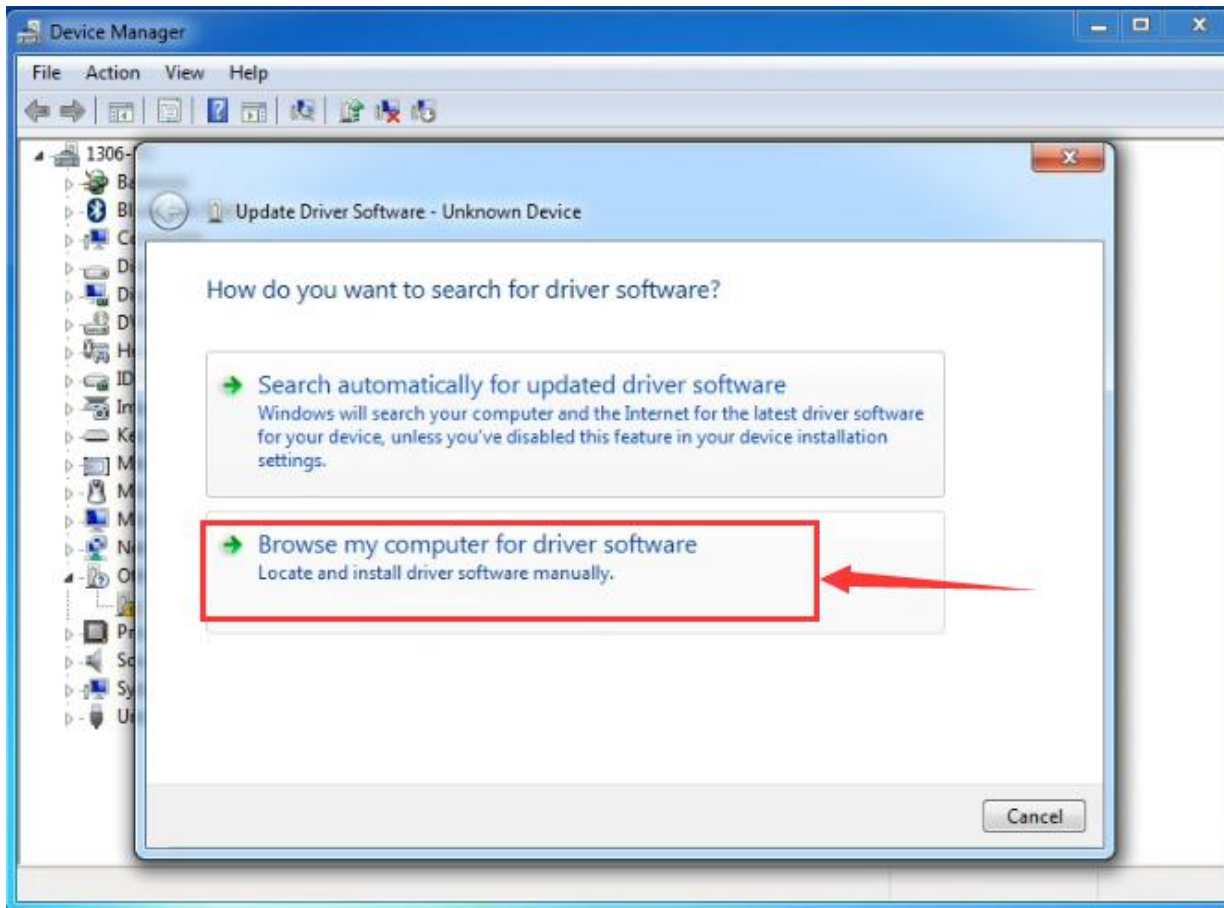

When you connect UNO board to your computer at the first time, right click the icon of your *"Computer"* —> *for "Properties"*—> *click the "Device manager"*, under "Other Devices", you should see an icon for "Unknown device" with a little yellow warning triangle next to it. This is your Arduino.

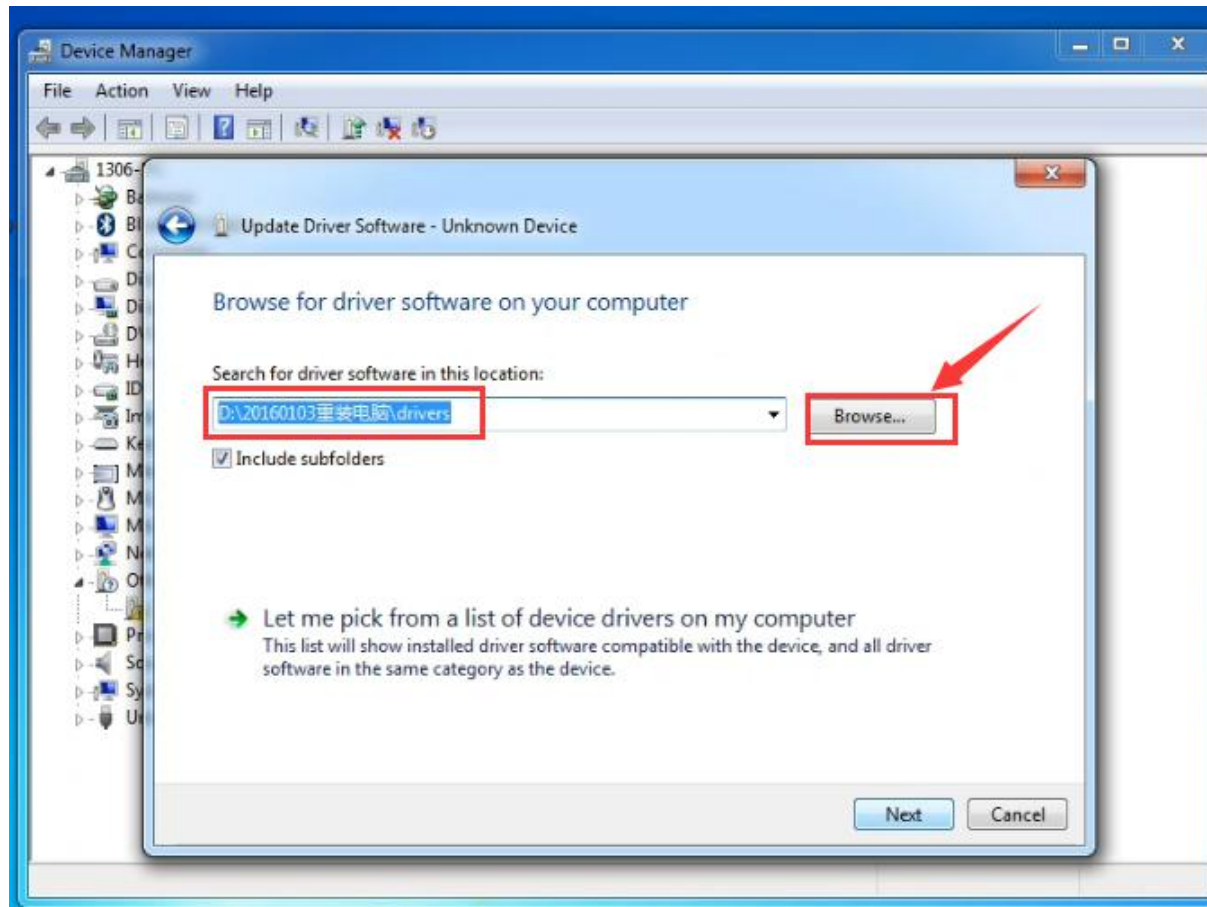

Then right-click on the device and select the top menu option (Update Driver Software...) shown as the figure below.

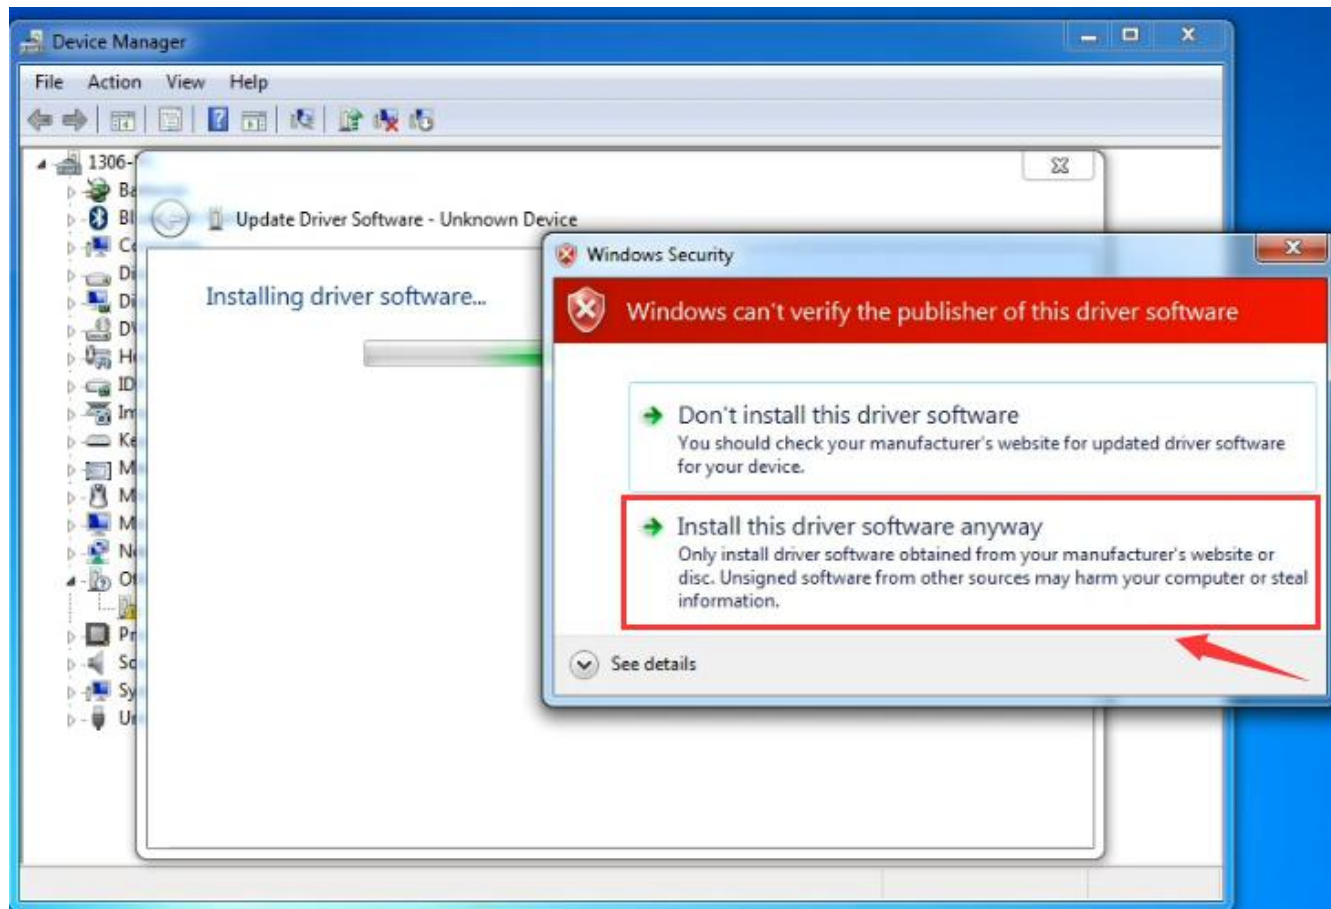

It will then be prompted to either "Search Automatically for updated driver software" or "Browse my computer for driver software". Shown as below. In this page, select "Browse my computer for driver software".

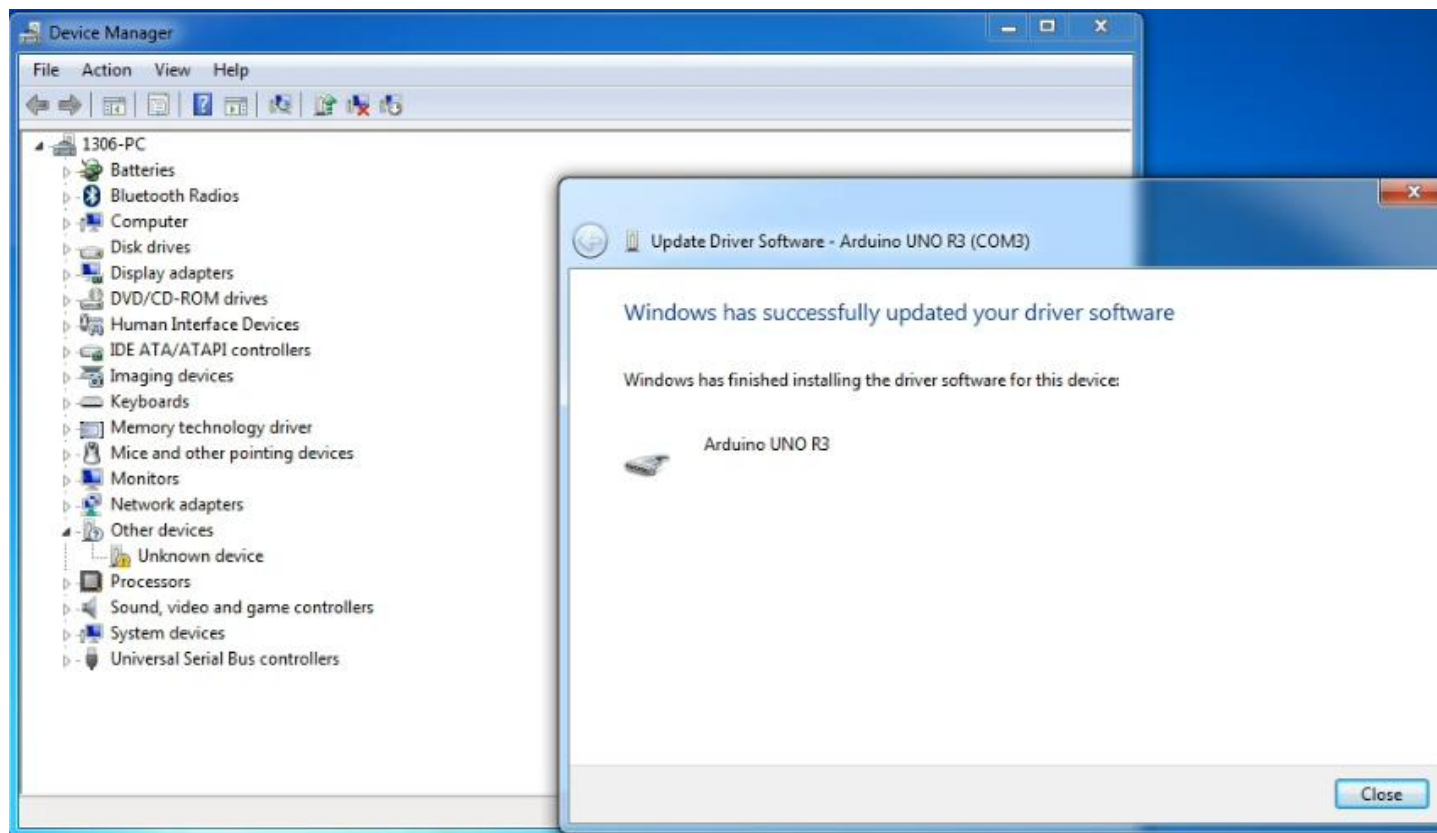

After that, select the option to browse and navigate to the “drivers” folder of Arduino installation.

Click "Next" and you may get a security warning, if so, allow the software to be installed. Shown as below.

Once the software has been installed, you will get a confirmation message. Installation completed, click “Close”.

Up to now, the driver is installed well. Then you can right click "*Computer*"
—> "*Properties*"—> "*Device manager*", you should see the device as the figure shown below.
